INSTRUCTIONS DE MONTAGE

SNAPSUN South System

- Tracer l'emplacement de l'installation

- Connecter et placer les bases SnapSun

INSTRUCTIONS DE MONTAGE

SNAPSUN South System

- Placer les Ballast selon le plan de lestage , 2 options possibles:

- A Ballast de coté avec un U inox
- B Ballast centrale sur 2 cornières inox pour plus de poids

- Monter les support d'étrier inox et poser les panneaux

INSTRUCTIONS DE MONTAGE

SNAPSUN South System

- Placer les connecteurs de panneaux en position:

- **A** pour cable long
- **B** pour cable court

Ces positions éviteront tout contact des câbles avec le revêtement du toit

- Visser les étriers à un couple de 12 à 14 N.m

- **A** pour Latéraux
- **B** pour les Centraux

INSTRUCTIONS DE MONTAGE

SNAPSUN South System

- Placer et visser les déflecteurs coté Nord:

INSTRUCTIONS DE MONTAGE

SNAPSUN South System

- Répétez l'opération pour des installations de plus grandes dimensions. Il suffit de connecter les bases entre elles par le système vis/écrou
